

18 type mountain drilling machine disassembly video

How do you lubricate a jmd-18pfn mill/drill?

Note: Handle shafts are already installed into hub on JMD-18PFN. the mill/drill is level after the fastening hardware has been tightened. Lubrication Lubricate all ball oilers on the machine once daily with 20W machine oil. The spindle bearings are permanently sealed and require no lubrication.

What if I don't know how to use a mill/drill?

If you are not familiar with the proper and safe use of mill/drills, do not use this machine until proper training and knowledge have been obtained. Failure to comply may cause serious injury. Disconnect the machine from the power source, unplug (11) and pull the motor toward the head casting to release tension on the v-belts (11).

How do you lift a mill/drill with Mobil DTE oil?

Cover all cleaned surfaces with a light film of Mobil DTE Oil Heavy Medium. Open the belt cover and thread the lifting hook into the head. Carefully lift the mill/drill with properly rated equipment to a sturdy stand or work bench. Remove the lifting hook. Screw rubber handles (A, Fig. 1) onto handle rod (B, Fig. 1).

What should I do if my mill/drill is heavy?

Machine is heavy! Use an appropriate lifting device and use extreme caution when moving the machine to its final location. Failure to comply may cause serious injury. The location for the mill/drill should be well lit, dry, and have room enough to allow the head to rotate 360°;

Can I use a mill/drill if I'm not familiar with the machine?

This machine is designed and intended for use by properly trained and experienced personnel only. If you are not familiar with the proper and safe use of mill/drills, do not use this machine until proper training and knowledge have been obtained.

How do you lift a mill/drill?

Open the belt cover and thread the lifting hook into the head. Carefully lift the mill/drill with properly rated equipment to a sturdy stand or work bench. Remove the lifting hook. Screw rubber handles (A, Fig. 1) onto handle rod (B, Fig. 1). Screw handle rod into downfeed hub (C, Fig. 1) and tighten.
