What drills can I use with the ROC L8?

The ROC L8 can be fitted with a range of Atlas Copcodown-the-hole rock drills - COP 44,54 and 64 (4" and 5" and 6"). These are among the fastest on the market. Their high performance, together with great functional reliability and outstanding service life, gives first-class drilling economy.

Is Atlas Copco ROC L8 a good crawler?

The ROC L8 is not just another down-the-hole crawler. It's a total solution for drilling in quarries and open pit mines. Everything you'd expect from Atlas Copco's ongoing commitment to raising standards in rock drilling technology. As always with Atlas Copco crawlers, operator comfort figures high on the agenda.

Can a ROC L8 be used as a down-the-hole crawler?

But there's more to the ROC L8 than power alone. Forget the idea that you need one small machine for pre-splitting and another larger one for production. You can use a single ROC L8 to do both jobs. The ROC L8 is not just another down-the-hole crawler. It's a total solution for drilling in quarries and open pit mines.

What's new with Roc L drills?

This new version of the proven ROC L series of down-the-hole crawler drills offers extended performance through increased operating pressure and a new genius cylinder feed system.

What is a ROC L8?

Hole diameters 110-165 mm (4 1/2" - 6 1/2") Atlas Copco's new ROC L8 is a high production down-the-hole crawler with ample power to deliver high penetration rates and deep holes. It has a rod handling capacity for hole depths of 54 meters (176 feet). But there's more to the ROC L8 than power alone.
