

Bk series oil-injected screw air compressor instruction manual

How oil injected screw air compressor works?

The oil-injected screw air compressor has the characteristics of reliable running performance, few wearing parts, low vibration, low noise, and high efficiency. During the compression process, the compressor continuously sprays lubricating oil into the compression chamber and bearings by virtue of its own pressure difference.

What is a manual for oil injected screw compressor?

The manual instructs users to read it carefully for safe and reliable operation of the compressor. It describes the general principles and body structure of oil-injected screw compressors. iSharp Abrasives Tools Science Institute. strict quality control and testing before leaving the factory. However, in order to

What are the specifications for oil-injected rotary screw air compressors?

The document provides specifications for various models of oil-injected rotary screw air compressors, including: 1) Capacity and pressure ranges from 0.5-28.5 m³/min and 0.7-1.3 MPa depending on the model. 2) Motor power ranges from 5.5-220 kW. 3) Noise levels are generally between 65-75 dB (A).

What is a screw compressor manual?

This manual covers the working principle and main structure of our screw compressor. In order to let the users make the best use of our products, we try to compressor. Read this manual before the installation and startup of the compressor. Contact our service department at any time if you need assistance. General Description

How does a compressor lubrication system work?

decreases the noise made by the high speed of the compressor. The lubricant weight is about 5-10 times that of air. The design provides for enough inlet air, and the air is modulated by an inlet valve. As the rotors rotate they create a vacuum which sucks air in through the inlet valve.

How much oil do you put in a air compressor?

Open valve (7) and drain approximately 0.2 l(0.05 US gal /0.04 Imp gal) of oil into a clean receptacle. Carefully pour this oil through the filter housing into the compressor element. Fit the air filter and screw on the filter cover. Refit the top and front panels. Check the oil level.
