Who is Canun rock drills & service parts?

Since the launch of CANUN Rock Drills and Service Parts in 1981, we have grown to become a leading supplier of equipment throughout the Western Hemisphere. Today, CANUN products reach customers on five continents.

What is a rock drill?

A machine designed for drilling holes in rock, primarily used for blasting or anchoring purposes. Rock drills are essential in both underground and surface mining, particularly in hard rock environments where strong, resilient equipment is required.

What drilling tools does Hardrock-vertex offer?

We also supply a line of Down the Hole hammers and drill bits, and hole openers of all sizes. Hardrock-Vertex will work with our customers to design any drilling tool they feel may be advantageous to their drilling environment. We stand behind our products and provide ongoing After Purchase service and support.

Why do you need a rock drill?

Rock drills are essential in both underground and surface mining, particularly in hard rock environments where strong, resilient equipment is required. With automation and digital control systems, rock drills are increasingly capable of precise, controlled drilling patterns.
