

# Core Drilling Rig User Guide with Pictures

How should a core drill rig be bolted down?

1. The core drill rig must be bolted down 100% firmly- even a .5mm vibration typically where anchored to an uneven floor/wall can result in damage to both the core bit and the machine. Ensure all is tightened securely - see page 5  
2. The drill speed (R.P.M.) should be correctly chosen for the diameter of the core bit.

What equipment do I need for a core drill rig?

Include Dynabolts or appropriate alternative, sds bits, large diameter steel washers for rig centre U slot bolting, Stilson/spanners for locking/unlocking core bits, ratchet & socket/s and the tools supplied with your core drill machine and rig. A dedicated water hose reel if drawing from water mains etc.

How do I choose a core drill machine?

When choosing a core drill machine there are two main factors to consider, firstly what are the largest diameter holes typically required and is hand held drilling a requirement. Diamond core drill machines are rated for the largest core they can cut either as hand held or mounted on a core drill stand (rig).

How do I choose a diamond core drill machine?

Diamond core drill machines are rated for the largest core they can cut either as hand held or mounted on a core drill stand (rig). After this decision is made then choosing a machine is clear and straight forward.

What tools do I need for core drilling?

Make up a tool kit specific to core drilling. Include Dynabolts or appropriate alternative, sds bits, large diameter steel washers for rig centre U slot bolting, Stilson/spanners for locking/unlocking core bits, ratchet & socket/s and the tools supplied with your core drill machine and rig.

How do you bolt a core drill rig to a concrete floor?

For securely bolting down the core drill machine rig base onto concrete floors or walls, Concrete Screw Bolts or Dyna Bolts together with spreader washers and a ratchet socket driver makes the task quick and efficient. Two bolts may be used for large diameter core drilling.

The Christensen range of surface core drilling rigs has, over many years, established itself a reputation for reliability and ease of use. Many Christensen ...

Proprietary Drill Head Our P sized Drill Head is rated to take up to 500hp and up to 70,000lbs of pull back. We have eliminated the main sources of Drill Head failures including the chuck ...

CARRIAGE, COLUMN AND BASE The carriage, column and base assembly of the MK-Manta III Core Drill is the strong, sturdy drilling platform that provides the rigidity needed to quickly drill ...

In the realm of mining and geological exploration, core drilling rigs stand as indispensable tools. These machines play a pivotal role in extracting cylindrical samples of ...

Whether you use a light-duty diamond driller kit or a larger, heavy-duty rig, with the appropriate diamond core drill bit drilling through concrete and masonry ...

Diamond core drill machines are rated for the largest core they can cut either as hand held or mounted on a core drill stand (rig). After this decision is made then choosing a machine is ...

Take appropriate precautions to ensure that, in the event of a drilling core dropping out, no personal injury or material damage will result. When drilling hollow components, check the flow ...

The shaft extension rods allow drilling deeper than the length of the core drill bit: Follow the above operating instructions, drill up to the end of the core bit.

This Edco electric core drill rig rental is designed for making precise holes in concrete and stone. This rental is an Edco stand mount core drill. We rent all of the core bits needed for this unit. A ...

This Operation and Parts Manual has been developed to provide complete instructions for the safe and efficient operation of the MQ Models DM15A9C/CDM2SA Core Drill Motor and Drill ...

The DD 120 is an electrically-powered, rig-type diamond core drilling machine for drilling through-holes and blind holes in (reinforced) mineral materials using diamond core bits and the wet ...

The core drilling rig is a multifunctional drilling equipment, mainly used for the survey and exploration of metal and non-metallic solid minerals, water well drilling, and can also be used ...

The purpose of the 8"Z1 Core Drill is to drill through masonry, concrete or other mineral rock types using annular coring bits. These drills are designed to be bolted to the drilling surface through ...
