

DLG series low pressure fixed screw air compressor

What is a rotary screw compressor?

Rotary screw compressors are ideal for so many industries and applications. Unlike reciprocating compressors, rotary screw compressors are designed for continuous compressed air use and produce a consistent flow of air.

What is a lubricated rotary screw compressor?

For decades now, the lubricated rotary screw compressor has been the most popular technology for the majority of industrial plant air applications from 15kW to 250kW with airflows up to 50 m³/min. The air end on a compressor package is the component that takes in the air, compresses it and discharges it to the rest of the package.

What is a Gardner Denver rotary screw air compressor?

Gardner Denver rotary screw air compressors are well known for their durability and efficient performance across a wide range of customer applications. With so many models to choose from and almost endless customizations, Gardner Denver has the compressor to fit your requirements.

Which rotary screw air compressors are available at 175 psi?

Units are available at 175 PSI (QGSV 5-10 150PSI). Quincy Compressor proudly introduces the latest addition to our lineup: the QGD 75-125 range of rotary screw air compressors!

What is a QGD rotary air compressor?

The QGD rotary air compressor line is specifically designed to provide reliable compression in the most challenging applications. The Airlogic 2 advanced control enables the compressor to operate with maximum efficiency. With a sound level as low as 66 dBA, you're assured of quiet operation. The QGD is also designed for easy serviceability.

Are Gardner Denver compressors lubricated?

Gardner Denver compressors, just as all lubricated rotary screw compressors 5 HP and above, are third-party tested to ensure that our performance numbers are accurate, easy-to-understand and verified. A healthy compressed air system requires much more than just an air compressor.
