Does a compressor installation require maintenance?

As with all equipment, a compressor installation requires some form of maintenance. However, maintenance costs are low in relation to other costs and can be reduced further through careful planning measures. The choice of the maintenance level is determined by the required reliability and performance of the compressed air installation.

Are all compressor maintenance costs the same?

Not all compressor maintenance costs are the same, and so, it may be worth checking before selecting a compressor and comparing the maintenance costs down the line. Included in the maintenance part of the equation is the cost of the spare parts for regular maintenance and parts costs for emergency repair.

How can a compressor maintenance cost be reduced?

Costs can be reduced by combining condition monitoring with other functions when using equipment for fully automatic operations, and monitoring of the compressor central plant. The annual maintenance cost is usually between 5-10% of the machine's investment value. The total budget for maintenance is affected by:
