

Diesel air compressor stone breaking video tutorial

Are jack hammers better than diesel air compressors?

Diesel air compressors have many benefits for jack hammers. They are more powerful and efficient than electric air compressors. They also have a longer lifespan. The Jack hammer is a high-efficiency rock drill that is generally used to mine stone directly.

What type of air compressor is used for Jack Hammer?

Most air compressors used for this purpose have a pressure of 7bar to 8bar. The diesel portable compressor is recommended for general outdoor use. The model and qty of the jack hammer determines the diesel portable air compressor that will be used. The Kotech diesel portable air compressor is widely used for jack hammer in mining.

What pressure should a Jack Hammer air compressor have?

The air compressor can operate with many different construction equipment also, like drilling deep wells, quarry and constructing tunnels. The air at the inlet of the jack hammer should ideally be dry, and the pressure should be maintained at 5bar, at least 4bar. Most air compressors used for this purpose have a pressure of 7bar to 8bar.
