

Domestic screw air compressor agent brand

What is a screw compressor?

A screw compressor is a type of compressor that employs screws to continuously compress fluids. One notable example is the air compressor, where air drawn in from the intake is compressed between a pair of screws and discharged as compressed air. This is the principle behind screw compressors known as the twin-screw type.

Who makes screw air compressors?

As one of the largest professional manufacturers of screw air compressors, they are experts in the research, development, production, and sales of air compressors and related products. In 2017, they became part of the Hitachi Group of Japan, further solidifying their position in the industry. 1. Atlas Copco Country: Sweden Founded: 1873

How to choose an air compressor manufacturer?

An air compressor is a device used to compress gases. It shares a similar construction with water pumps. Most air compressors are of the reciprocating piston type, rotary vane, or rotary screw variety. When selecting an air compressor manufacturer, the brand's market position and product diversity should be the primary considerations.
