

Down-the-hole drilling rig with automatic loading and unloading rod

It can drill vertical, inclined and horizontal holes, used for drilling and pre-splitting holes in open pit mines and stone works, etc.

The large-section aluminum alloy guide rail ensures sufficient strength, and it is equipped with a flexible and convenient automatic loading and unloading drill pipe mechanism and drill pipe ...

SDKH103 automatic integrated surface down-the-hole drilling rig is a drilling equipment that integrates a down-the-hole drilling system and a screw air compression system, with automatic ...

The ZT10 integrated down the hole drill rig for open use is a new drilling device and production of down the hole drill rig to meet the needs of large open-pit ...

The operation mode of connecting and unloading rods directly affects the overall work efficiency and the service life of rock drilling tools.

Crawler Down-the-hole Drilling Rig Integrated Open-air Automatic Pick-up and Unloading Rod, Anda dapat memperoleh detail lebih lanjut tentang Crawler Down-the-hole Drilling Rig ...

Yugong DTH drilling rig can drill vertical, inclined and horizontal holes, and is mainly used for drilling blasting holes and presplitting holes in open-pit mines ...

PD INNOVATE PDKJ- 103 Integrated Automatically Changing Rod Down -the- hole Drill rig Features: 1: Automatic receiving and unloading rod system, to meet a single ...

The drilling rig is equipped with automatic rod loading and unloading system and drill pipe lubrication module, which can realize single-person operation and ...

SDKH103 automaticintegrated surface down-the-hole drilling rig is a drilling equipment that integrates a down-the-hole drilling system and a screw air compression system, with automatic ...

A side-sliding rod handler, attached to the base of the drill rig"s mast. It handles the feeding and retrieving of rods and casing between the DRS and drill rig, completely hands-free.

The hydraulic mechanical arm and drilling rod warehouse are used to dismantle the drilling rod and the floating joint to protect the thread of drilling rod, one operator can dismantle the drilling ...

Down-the-hole drilling rig with automatic loading and unloading rod

The drill rig is outfitted with an automatic unloading rod system and a lubricating module drill rod and can be operated by a single worker. With hydraulic pilot operation, it is equipped with an ...

Kaishan DTH drilling rig ZT10 is robust performance in hard rock, fuel efficiency, wide drilling range & versatility, and easy maintenance.

Dual-tube directional drilling technology is an effective method to solve the problem of long directional drilling in soft coal seam. According to the ...

Kaishan KT7C blast hole drilling rig is robust performance in hard rock, fuel efficiency, wide drilling range & versatility, and easy maintenance.

The hydraulic mechanism is used to dismount the drilling rod, the floating joint to protect the thread of drilling rod, the automatic unloading rod device to relieve ...

Applications If you are looking for a Surface mining DTH drilling rig, with safety cab, automatic loading and unloading drill rod system, anti-jamming function, powerful diesel engine and air ...

The high air-pressure screw nose and high air-pressure pneumatic impactor contribute to efficient drilling. It is equipped with the dry hydraulic dust ...

Leopard(TM) DI550 diesel-powered, down-the-hole (DTH) drill has enhanced mobility, a smaller footprint and can serve multiple sites. Designed for DTH ...

The KT15C integrated down the hole drill rig for open use can drill vertical, inclined and horizontal holes, mainly used for open-pit mine stonework blast holes and pre-split holes. 1. It is driven ...

Connecting and unloading rod is one of the important processes in the drilling process of submerged-hole drilling rig. The unloading rod device ...

The integrated open-pit down-the-hole drilling vehicle is an advanced drilling equipment that integrates the down-the-hole drilling system and the screw air ...

Connecting and unloading rod is one of the important processes in the drilling process of submerged-hole drilling rig. The unloading rod device not only affects the labor ...

The ZT series integrated down the hole drill rig for open use is a new drilling device developed by Kaishan group after years of development and production of down the hole drill rig to meet the ...

It is equipped with Yuchai Power Non-road National III diesel engine, high-strength aluminum alloy

Down-the-hole drilling rig with automatic loading and unloading rod

propulsion beam, automatic rod loading and unloading system, drill pipe lubrication ...

The down the hole drilling machine is equipped with automatic unloading rod system and drill rod lubrication module, which can realize single operation and reduce mine ...

The mainframe of the drilling rig with automatic drilling function, and the rod adding device that can complete the automatic loading and unloading of the drill pipe and casing under different ...
