Can a certificate of fitness holder repair an air compressor?

All major repairs must be made by a qualified technician; however, the Certificate of Fitness holder may make minor repairs and perform maintenance on the air compressor. For example, certificate of fitness holders must know how to correct the air compressor's cooling system.

Who should notify the site safety manager if an air compressor is unsafe?

Notifications: The person responsible for the supervision of air compressors should notify the site safety manager if an unsafe condition has been created. Any person who becomes aware of a fire or explosion or any other emergency shall immediately report such emergency to the Fire Department (Call 911).

Do I need A FDNY permit for air compressors?

A FDNY permit is required if a compressor is used to compress any nonflammable, corrosive or oxidizing gas, including air to a pressure exceeding 100 psi. However, outdoor air compressing (other than a fair or festival) is not required a FDNY permit. These permits are issued by the Bureau of Fire Prevention. AIR COMPRESSORS

How to test an air compressor?

The testing procedures should check that air is no longer compressed when the preset level is reached. The air compressor must have a warning label indicating the level of pressure which is considered dangerous. This should be clear in the air compressor manual as well. The Pressure Relief Valve
