Which Tamco Rock Drill is right for You?

TAMCO offers a rock drill that will fit your distinct requirements. The Toku TS-55 60 pound class rock drill has all the power needed for the biggest jobs. They feature rugged construction and are designed for larger diameter bits and deeper drilling jobs. The Toku TJ-20 and TJ-15 are mid-sized rock drills that pack a big punch.

How technology is transforming rock drilling?

Recent years have seen an influx of technology-driven solutions in rock drilling. High-performance drills are becoming equipped with smart sensors and automation capabilities. These innovations enable real-time monitoring of drilling conditions, ensuring precision and efficiency.

What is a rock drill?

Let's briefly lay down some groundwork: Rock drills are machines or tools specifically designed to penetrate hard surfaces like stone, concrete, or mineral deposits. These drills come in various forms and sizes, each tailored for unique drilling requirements, be it for construction, mining, or archaeological excavations.

What is a Toku Rock Drill?

The Toku TH-800 and THD-1100N are lightweight drills that are able to get into smaller spaces other drills cannot. These D-handled drills pack big power in a compact package. All Toku rock drills feature replaceable chuck bushings, drop forged alloy steel construction, and forged latch retainers.

How do I choose the best apt Rock Drill?

Learn how to select the ideal APT rock drill for your specific tasks, covering key factors to consider for efficiency and optimal performance on the job. Drill through rock with ease. Our 9-60 lb Rock Drills hit 2,100-3,400 BPM, great for anchor holes, blasting prep, or tough surfaces. Use wet or dry with the APT valve for total jobsite control.

How do I choose a rock drill?

Here's a breakdown of the critical elements that should guide your decision-making when venturing into rock drilling. The nature of the rock dictates which kind of drill will perform best. Soft rock, like sandstone, may respond well to rotary drills, while hard rock, such as granite, demands robust percussion or diamond drills.
