

First 90 down-the-hole drilling rig launched

Sandvik Mining and Rock Solutions has launched the fourth drill rig under its x-series rotary blasthole line, designed to increase drilling efficiency and productivity.

“Since their first production application in Sweden in 1995, water-powered, down-the-hole hammers (WDTH) have been used throughout the world in many different drilling ...

Rock Drilling There are three methods of rock drilling for production holes: Rotary high rotational speed, low torque and thrust low ...

Discover the benefits of large-diameter DTH hammer drilling technology. Achieve efficient, precise, and sustainable deep hole drilling for ...

Discover the impact of Down the Hole Hammers (DTH hammers) in urban redevelopment projects. Learn how these specialized tools enable ...

Explore the efficiency and precision of Down-the-Hole (DTH) hammers in modern drilling applications. Learn about their mechanism, key components, advantages, and diverse ...

Leopard(TM) DI560 is a highly mobile, compact, diesel-powered down-the-hole (DTH) drill designed for DTH blasthole drilling in mining, quarry and ...

In 1936, Atlas added compressed air power to a pusher leg for a new, one-man rock drill that garnered much praise. That same year, the company developed ...

Down the hole drilling offers numerous compelling advantages that make it the preferred choice for many drilling applications. First, the method delivers superior penetration rates, particularly ...

Different Models of Down the Hole Drilling Rigs: YGD-70/100 DTH Drilling Rig YGD70/100 DTH drilling rig is a kind of compound power model, powered by a ...

The YGS series down the hole drilling machine are heavy-duty crawler drilling rigs developed by YG Machinery for high-intensity geological environments, which are suitable for hard rock, ...

New series of Down The Hole Drill “DCR L130-F5” for the U.S. and Europe launched Reduced fuel consumption and high drilling performance

First 90 down-the-hole drilling rig launched

In down-the-hole drilling a drill rod is fitted with a hammer at its lower end. The hammer, which is mounted on the drill bit, is activated through the addition of ...

Down the hole drilling rig is to make the impactor dive into the hole in the process of rock drilling to reduce the energy loss caused by the transmission of the ...

Transporting and assembling the rig may take 50-75 workers (two crews), 35 - 40 vehicles, and take up to four days. If a multi-well pad is used, once the rig is ...

Integrated Surface DTH Drill Rig An Integrated DTH (Down-the-Hole) Drill Rig is an advanced drilling system designed for efficient and precise drilling in hard ...

Down-the-hole (DTH) drilling is a method used to drill boreholes in hard rock formations for various applications such as mining, construction, and quarrying. This technique involves a ...

- Down-the-hole (DTH) drilling machines for water well drilling (200 kg, 2 m length) - Truck-mounted rotary drilling rigs for geotechnical investigations (2 tons, 4 m height)

Surface drilling rigs play a crucial role in industries like mining, construction, and oil & gas exploration. These versatile machines are ...

The XD-420T series crawler open-pit down-the-hole drill rig is a new type of down-the-hole drill developed to meet market demand. This product has excellent performance, ...

A Down-The-Hole drill rig that opened a new market for Sandvik was awarded the "Wilhelm Haglund Medal to the Product Developer of the Year" in connection with the 2024 ...

Down-the-Hole (DTH) drilling is a technique used to create deep, precise holes in hard rock and challenging ground conditions. In this method, ...

To meet market demand, ZEGA Company has launched the large diameter down-the-hole (DTH) drilling rig D490A. The main technical parameters of this rig are...

DTH rig machine, down-the-hole drilling rig, is a powerhouse drilling tool designed for deep, accurate, and efficient boring in demanding environments. Ideal for mining exploration, quarry ...

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small cuttings and dust that are evacuated by a fluid (air, water or drilling mud). The DTH hammer is one of the fastest ways to drill hard rock. The system is thought to have been invented independently by Stenuic...

First 90 down-the-hole drilling rig launched

Rock Drilling There are three methods of rock drilling for production holes: Rotary high rotational speed, low torque and thrust low rotational speed, high torque and thrust Rotary ...
