View online or download Atlas copco GA250W Air Compressor Instruction Book

How should a compressor be operated?

Operate compressor in a well-ventilated area free from flammable liquids and vapors. Operate compressor in a ventilated area so that compressor may be properly cooled and the surrounding air temperature will not be more than 100°F (38°C). Never use a compressor in a wet environment. Protect material lines and air lines from damage or puncture.

How do you open a air compressor?

Open the air system to free it of any pressure. Switch the compressor on for a few revolutions to make sure the rotation is correct. Correct rotation is clockwise when facing the sight glass on the pump. Operate the compressor for a few minutes unloaded (air system open) then allow the compressor to pump up.

How do you fix a clogged air compressor?

Make sure all rags, tools, oil, etc. are away from the unit. Open the air system to free it of any pressure. Switch the compressor on for a few revolutions to make sure the rotation is correct. Correct rotation is clockwise when facing the sight glass on the pump.
