

Garage conversion down-the-hole drill video tutorial

How does a down-the-hole drill work?

In down-the-hole drilling a drill rod is fitted with a hammer at its lower end. The hammer, which is mounted on the drill bit, is activated through the addition of compressed air and driven into the ground - simultaneously rotating and impacting. A flushing current collects the loosened drill cuttings and conveys them upwards.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

What is a down-the-hole drilling method?

The video shows the down-the-hole drilling method for very hard soil or rock. A rotary drilling rig, type LB 20, working with down-the-hole hammer inside a casing. A flushing current conveys the loosened drill cuttings upwards and exits at the upper end of the casing.

Is a garage conversion a good idea?

Converting a garage into additional living space can be a great solution if your current living conditions are cramped and, if done properly, some have estimated it can add an additional 10% to the value of your home! Do I Need Planning Permission for a Garage Conversion?

How do you drill a rock with a DTH hammer?

This method is mainly applied for hard to very hard rock and/or for penetrating large boulders. 1. Setting the DTH hammer with drill rod and casing on the drilling point. 2. Rotary and percussive drilling of the drill string under compressed air supply. 3. After reaching the final depth, unlocking of the drill rod with DTH hammer and pilot bit.

What are the requirements for a garage conversion?

As with any room in a home, suitable ventilation and heating are key requirements in terms of making the space "habitable", and this is no different when it comes to a garage conversion. As with any other aspect of building or construction, the exact specifications are stated in the Building Regulations.
