What is a screw compressor?

Screw compressors are a type of compressed air compressor that generates compressed air through the rotation of two rotary screws. These screws, also known as rotors, move in opposite directions and compress the air in the interspace.

Who makes the best screw compressors?

BERG Compressors GmbH specializes in the development and production of high-quality screw compressors. The KOMPBERG and BSDF series offers outstanding efficiency and reliability. With a large, slow-running air end and an energy-saving CMC controller, these compressors provide impressive performance across the entire control range.

Do you offer rigid screw compressors?

We offer rigid screw compressors for constant compressed air requirements or frequency-controlled compressors for customised adaptation to fluctuating compressed air requirements. The systems are optionally equipped with a low-maintenance V-belt drive, robust gear drive or efficient direct drive.

Who makes rotorcomp air compressors?

ROTORCOMP is a prominent OEM supplier of screw compressors for air and gas, offering a comprehensive range that includes oil-injected screw compressor blocks and compact units. Their product portfolio spans a power range from 2.2 to 670 kW, making them a key player in the air compressor market.

Why should you choose AlMiG screw compressors?
