What is a hydraulic water well drilling rig?

A hydraulic water well drilling rig is a kind of high-efficiency and multi-function drilling equipment that is mainly used for drilling wells, agricultural irrigation wells, ground source heat pump wells, and some other types of wells, especially suitable for water intake projects in mountainous areas and rock formations.

How does a water well drilling rig work?

Water well drilling rigs employ different drilling methods, such as cable tool drilling and rotary drilling. In cable tool drilling, a heavy drill bit is repeatedly lifted and dropped to break through the ground. Rotary drilling, on the other hand, uses a rotating drill bit to cut through the soil and rock.

Why should you choose Bauer drilling rigs?

With Bauer drilling rigs, you can accomplish your specialist foundation engineering projects in an efficient, safe and sustainable manner. Efficient, because we also deliver matching accessories and all drilling tools from a single source along with the multi-function equipment.

What are the different types of drilling rigs offered by Simco?

With a focus on the specific processes involved in geothermal drilling, geotechnical drilling, and water well drilling, these drilling videos enable you to see the differences between the various drilling rigs offered by SIMCO. A variety of geothermal drilling videos allow you to view Air Rotary DTH Hammer and Mud Rotary drilling.

What types of drilling rigs are available?

The drilling videos featured here on our website showcase the capabilities of various types of drilling rigs, including water well drilling, auger drilling, core drilling, and more.

What is a Klemm drilling rig?

KLEMM drilling rigs set standards for the level of power, safety and quality of this particular construction machine.
