Why should you choose Kaishan screw air compressors?

Kaishan's Screw Air Compressors (High pressure portable series) helps save oil consumption by 100 L per day. Portable Screw Air Compressors are widely used in various industries for mines, water conservation and supplies, shipbuilding, city development, energy development, military services, and others.

Why should you choose a screw air compressor?

This particular feature makes it to satisfy the needs of any project in performance and traction with electric or internal combustion engines, in order to maximize performance and reduce energy consumption. ONE OF THE LARGEST PROFESSIONAL SCREW AIR COMPRESSOR MANUFACTURERS IN CHINA.

What are the specifications for oil-injected rotary screw air compressors?

The document provides specifications for various models of oil-injected rotary screw air compressors, including: 1) Capacity and pressure ranges from 0.5-28.5 m<sup>3</sup>/min and 0.7-1.3 MPa depending on the model. 2) Motor power ranges from 5.5-220 kW. 3) Noise levels are generally between 65-75 dB (A).

How oil injected screw air compressor works?

The oil-injected screw air compressor has the characteristics of reliable running performance, few wearing parts, low vibration, low noise, and high efficiency. During the compression process, the compressor continuously sprays lubricating oil into the compression chamber and bearings by virtue of its own pressure difference.

What is a screw air compressor?

A screw air compressor is a type of rotary compressor which packs air because of screw air activity. The main advantage of this air compressor is that it can supply jets air continuously with the minimum variance in conveyance pressure. It is typically applied for low weight applications up to 8 bars. How Does screw air Air Compressor Work?

What is LG series standard electric screw air compressor?

LG Series Standard Electric Screw Air Compressor adopts 0-100% infinitely variable control of displacement to realize optimal energy saving effect. The system adopts continuously variable displacement from 0% to 100%. The displacement will decrease as air consumption decreases.
