

How heavy is a 3 000-meter core drill

What size is a drill core?

Drill-core comes in various sizes including; PQ which is 85.0 mm in diameter, HQ is 63.5 mm and NQ is 47.6 mm. Typically as the holes gets deeper the drill core size is reduced. After collecting the core trays from the drill rig they are laid out in an area where logging, sampling and storage takes place, normally a purpose built core shed.

Why should you choose a DMS 400 drill?

Enables high drilling performance. The LED indicator shows the load of the machine, allowing the operator to always drill at maximum pressure, for best performance. Didn't find your document? DMS 400 is a powerful and sturdy electric core drill and stand for medium to heavy core drilling where reliability and high productivity is needed.

Why should you choose a metal drilling machine?

The metal design with optimal setup of steel, aluminium and magnesium components ensures stability and durability without adding unnecessary weight. Enables high drilling performance. The LED indicator shows the load of the machine, allowing the operator to always drill at maximum pressure, for best performance. Didn't find your document?
