Can a CPA Rock Drill be used as an excavator?

Transform your excavator into a rock drill with the Montabert® CPA Rock Drill line. CPA Rock Drills are known for being low maintenance and high performance due to the Montabert® Drifter. The CPA Rock Drill is a true attachment allowing more versatility of an excavator on job sites

How does a rock excavator work?

One excavator can complete the rock drilling and splitting operations. This saves the costly use of a rock drill. There is no need to frequently move the equipment during work, which greatly improves rock breaking efficiency.

Does a rock splitter need a drill to drill a hole?

Unlike other stand-alone rock splitters mounted on an excavator, it does not require an additional rock drill to pre-drill the hole. One excavator can complete the rock drilling and splitting operations. This saves the costly use of a rock drill.

What is a Tei rock drilling attachment?

TEI rock drilling attachments are the most versatile excavator drilling platforms available for ground improvement, earth retention and rock drilling applications.

Why do you need a hydraulic rock drill & splitter?

There is no need to frequently move the equipment during work, which greatly improves rock breaking efficiency. Integrated hydraulic rock drills and splitters are widely used in open-pit mines, quarries, building foundations, tunnel excavation, road construction, water conservancy projects, etc.
