

# How to disassemble the screw air compressor gun head

How do you remove a cylinder head from an air compressor?

**DEPRESSURIZE THE AIR TANK.** Always depressurize the tank before servicing an air compressor. To do this, open the drain valve and wait until all of the air (and pressure) has escaped. **REMOVING THE CYLINDER HEAD [top]** 1. Remove the manifold cover. Remove the retaining screw. Lift the manifold cover away from the unit. 2.

How do you depressurize an air compressor?

Always depressurize the tank before servicing an air compressor. To do this, open the drain valve and wait until all of the air (and pressure) has escaped. **REMOVING THE CYLINDER HEAD [top]** 1. Remove the manifold cover. Remove the retaining screw. Lift the manifold cover away from the unit. 2. Remove the pump assembly from the tank.

How do you install a compressor head?

Align the valve plate assembly (and cylinder gasket) with the compressor pump. (The cylinder gasket and the exposed valves should be facing the cylinder-side of the pump.) Align the head gasket with the valve plate assembly. Install the cylinder head. Install the head bolts.

What is a cylinder head in an air compressor?

As the name implies, a cylinder head sits at the top (head) of an air compressor pump. Its purpose is to route air through the compressor and to dissipate heat. Although it is uncommon for a cylinder head to deteriorate with normal use, damage from accidental impacts (such as dropping the unit) would necessitate replacement.

How do you remove a compressor shroud?

Do not forget the gloves while performing this. **Step 2 - Compressor Shroud.** Use a screwdriver (slot tip) to unscrew the shroud screws, and then pull the shroud halves away from each other by focusing at the locking tabs. The shroud is now removed. **Step 3 - Dismantle The Pump Head.** Disconnect the air outlet tube after lifting the valve plate.

How do you reassemble a compressor pump?

**REASSEMBLING THE UNIT [top]** 8. Rebuild the compressor pump. Align the cylinder gasket with the valve plate assembly. (The gasket should be seated against the side of the valve plate that contains the exposed valves). Align the valve plate assembly (and cylinder gasket) with the compressor pump.
