

# How to move rock drills and excavators uphill

How do you move large rocks?

You can move large rocks small distances with a ratchet hoistor to help you situate the rocks for moving them manually by dragging them or using a plank and rollers. You can also use a skid steer, and while it's the easiest option, it's also the most expensive. No matter what method you choose, you'll be able to move large rocks to a new location.

How do you lift a stone uphill?

Wear heavy gloves. Even lifting the one edge can be a strain, so get low and lift with your legs and arms, not your back. Stay behind the stone and keep your hands clear when you drop it forward. This is an especially safe technique for moving heavy stuff uphill. However, it's slow and best for short distances.

How do you move boulders on a ratchet?

Use a hoist The hoist method allows you to move large boulders or rocks on your own. If you're going to use a hoist, you'll also need a prybar, a heavy duty rope or nylon cord, along with a sturdy ratchet crank. Gather together an assortment of bricks or blocks of wood to support the heavy rock during various points in the operation.

How do you roll a stone over a hill?

Keep the slope shallow enough that the stone being rolled along remains controllable. Too steep and not only is the stone very difficult to move, but it tends to roll backwards at the slightest provocation. A ramp made of rubble concrete covered in dirt with a board on top acting as a track to wheel the stone over.

How do you pull a rock from the ground?

6. Sled, tire or sturdy plywood A large, flat, sturdy piece of plywood, an old tire or a sturdy sled can be used to pull the rock smoothly along the ground using your own strength or that of a small tractor or draft animal.

How do you move rocks from a truck?

Use a wheelbarrow! Transfer the rocks directly from the truck, but make sure that there's someone along the front and back of the equipment. Another easy way to do it is with a ball cart, which is what you typically use to move large trees around the property with just one person.
