

# How to replace the oil level mirror of screw air compressor

How do I Check my air compressor oil level?

Check your air compressor oil level daily, or every time you use the air compressor. To check the oil level, follow these simple steps: Ensure the vehicle is parked on level ground and that the compressor system is depressurized and cool to the touch. Check the oil level in the sight glass.

Why does my compressor not have an oil sight glass?

It's possible that the sight glass doesn't have a circular mark in the center. If this is the case, you should ensure that the oil level is between 1/3 and 2/3 of the vertical height of the sight glass. My Compressor Doesn't Have an Oil Sight Glass?

How do I know if my air compressor has oil?

If your air compressor does not have a sight glass then you should judge the amount of oil being put into the air compressor by using the dipstick. This will have markings on it which will allow you to control the level to the desired amount.

How do I change the oil on my air compressor?

When changing your air compressor's oil, follow the instructions in your manual. Although the basics of an oil change are simple--drain the old oil and then pour in new oil--the individual steps can be significantly more detailed. As an example, here are the steps required to change the oil in VMAC's G30 gas powered air compressors:

What are air compressor oil sight glasses?

Air compressor oil sight glasses are crucial components to allow you to check the oil level inside of an air compressor. This article will provide you with all the relevant information about them, as well as provide you with products readily available on Amazon. What is an Air Compressor Oil Sight Glass?

What is a compressor oil level sight glass window?

The compressor oil level sight glass window will contain a circular mark in the middle (usually red) which will help you depict the level as it has upper (upper edge of circular mark) and lower limits (lower edge of circular mark).
