What is a Toku Rock Drill?

The Toku TH-800 and THD-1100N are lightweight drills that are able to get into smaller spaces other drills cannot. These D-handled drills pack big power in a compact package. All Toku rock drills feature replaceable chuck bushings, drop forged alloy steel construction, and forged latch retainers.

What are the different types of rock drilling?

Types of Drills: The landscape of rock drilling is vast, with rotary, percussion, diamond, and masonry drills catering to different needs. Choosing the right type can greatly affect not just efficiency but also the quality of the drilling performed.

What type of drill is best for a rock piercing?

Rotary Drills: Best for penetrating hard rock, these utilize a rotating motion combined with some form of hammering. Impact Drills: These deliver rapid blows to break the rock as they drill, making them effective for tougher materials. Percussive Drills: Ideal for softer rocks, they operate with a percussion mechanism without the rotary function.

Who makes Furukawa Rock Drill?
