

Maoming Water Well Drilling Rig Job Information Network

What does a water well driller do?

A water well driller has responsibilities that include operating a mobile drilling rig to drill and monitor groundwater wells for residential, commercial, industrial, and agricultural uses, most often when there is no readily available surface water. The types of drilling methods used include rotary, auger hammer, and reverse circulation.

What does a drill rig supervisor do?

Reporting to the Field Supervisor, The Driller operates the drill rig and manages Rig Hands to safely and efficiently complete water well drilling operations of each project. The ideal candidate will ...

What are the different types of drilling methods?

The types of drilling methods used include rotary, auger hammer, and reverse circulation. If the ground is especially hard, you may need to use explosives. After you drill the well in the earth, your duties include installing a pump, sterilizing the system to prevent bacterial growth, and starting the water flow.
