Since the 1960s, high-power independent rotary rock drills, hydraulic rock drilling rigs, and down-the-hole rock drills have developed rapidly. In 1970, the Montabert from French ...

A down-the-hole drill, usually called DTH by most professionals, is basically a jackhammer screwed on the bottom of a drill string. The fast hammer action breaks hard rock into small cuttings and dust that are evacuated by a fluid (air, water or drilling mud). The DTH hammer is one of the fastest ways to drill hard rock. The system is thought to have been invented independently by Stenuic...
