

Mine AI automatic rock drill

Epiroc is one of the leading drill rig manufacturers in the world. We offer rock drilling machines and other equipment for many different applications. For ...

Technological advancements in autonomous drilling rigs are transforming the mineral exploration sector through the introduction of refined automation and data analytics. ...

Strayos is a visual AI platform for mine-to-mill optimisation. We combine 3D photogrammetry, computer vision and human-centred design tools to streamline everyday workflows for mine ...

Stockholm, Sweden: Epiroc, a leading productivity and sustainability partner for the mining and infrastructure industries, continues to accelerate the transformation of the mining ...

How AI Transforms Drilling and Blasting: A New Era of Precision and Efficiency In the evolving landscape of drilling and blasting, the integration ...

Sandvik Mining is introducing AutoMine[®] Surface Fleet, a feature that, it says, enables operators to manage more than 15 Sandvik surface i-series drill rigs from any ...

Sandvik Mining and Rock Solutions has introduced its AutoMine[®] Concept Underground Drill, the company's second technology demonstrator for its ...

Auto-drill provides more consistent control of drilling parameters, with less wear on the drill feed, drill string, and rotation systems. More consistent drilling performance and more predictable ...

OEM Sandvik Mining and Rock Solutions has unveiled its second technology demonstrator for its future autonomous mining vision, the full ...

The award-winning Autorock Drill Rig revolutionised narrow-vein vertical support hole drilling for in-stope support in South African platinum mines. This patented double-clamping rig was ...

Remote drilling technologies play a crucial role in automating both underground and open-pit hard rock mining operations. These technologies ...

Sandvik Mining is introducing AutoMine[®] Surface Fleet, a feature that, it says, enables operators to manage more than 15 Sandvik surface i ...

Remote drilling technologies play a crucial role in automating both underground and open-pit hard rock

Mine AI automatic rock drill

mining operations. These technologies enhance efficiency and, most ...

The MacLean MDA Excavator Rock Drills are a valuable addition to your fleet. From quarrying operations, to secondary breaking, to construction drilling the MDA drill will do it all. Mounted ...

The Mini drilling platform uses TEI drifters and rotary heads. Hydraulic drifters have an Automatic Stroke Adjustment system for full percussion power during ...

Sandvik Mining and Rock Solutions is introducing Sandvik DD312i, a new intelligent, compact and automated single-boom jumbo.

The APT Model 138 Rock Drill is a tough, dependable 50-lb.class rock drill.Light enough at 50 pounds, yet tough enough to drill holes up to 15 feet deep.The Model 138, which is APT"s ...

Being able to transform mining haulage and logistics, automation now has the potential to revolutionise extraction processes. With the AutoMine Drilling system, Sandvik ...

This article aims to provide an overview of research trends and state-of-the-art technologies in face exploration and drilling operations in order ...

Automate your mining operations in Minecraft with the Auto-miner add-on. Eliminate tedious manual mining by delegating resource collection to ...

Pumps will be collecting resources only from the drills with the installed hoppers. You can equip Auto-drills with torches and a clock. Torches are used to light up the shaft. A clock is needed ...

The mining industry is undergoing a significant transformation through automation. From prospecting to mineral processing, technology is helping companies enhance ...

Sandvik Mining and Rock Solutions has introduced its AutoMine Concept Underground Drill, the company"s second technology demonstrator ...

The MacLean MDA Excavator Rock Drills are a valuable addition to your fleet. From quarrying operations, to secondary breaking, to construction drilling the ...

Robots continue to play a central role in mining, offering several benefits over traditional labor-focused operations. This article will briefly explore the use of robots and ...

Rio Tinto is employing a further nine autonomous drilling systems at its mines in Pilbara in Western Australia, taking the total to 20. The technology enables a remote operator ...

Mine AI automatic rock drill

Sandvik Mining and Rock Solutions is enabling fully autonomous fleet operation of multiple Leopard(TM) DI650i drill rigs from a remote control ...
