

Mobile tire repair air compressor for trucks is fixed on the locomotive

Which air compressor is best for mobile tire technicians?

However, technicians who regularly service heavy-duty tires greatly benefit from a higher CFM output. For these jobs, a 60-70 CFM air compressor tends to be a good choice. The best air compressors for mobile tire technicians are portable, rotary screw air compressors with enough CFM output to get the job done quickly.

What cfm air compressor should a tire technician use?

Considering these CFM requirements, tire technicians can accomplish most tasks with a 30-40 CFM air compressor. However, technicians who regularly service heavy-duty tires greatly benefit from a higher CFM output. For these jobs, a 60-70 CFM air compressor tends to be a good choice.

Are gas driven air compressors a good choice for mobile air?

Gas driven air compressors are the most popular type of air compressor on tire technician's trucks. They are affordable, easy to source, and simple to operate. All of these factors make them a smart choice for mobile air. However, not all gas driven air compressors are created equal.
