How are drilling rigs categorized?

They are categorized based on their application, operational environment, and drilling depth. Below is a detailed overview of the types of drilling rigs, their mechanical and electronic systems, and their offshore counterparts, including information about their manufacturers and main engines.

What is a modular drilling rig (MDR)?

Our proven Modular Drilling Rig (MDR) technologies are designed to service the platform drilling industry more efficiently and cost-effectively than fixed drilling facilities or Mobile Offshore Drilling Unit (MODU) for drilling, intervention and plug and abandonment (P&A) solutions.

What is a multi-environmental drilling rig?

We design and build multi-environmental drilling land rigs, for conventional and unconventional petroleum resources, which can operate in residential/urban areas, National Parks / Reserves, or any protected environment during animal migration seasons. The Drilling Control System (DCS) is at the heart of your drilling rig operations.

What systems are used in drilling rigs?

Common Mechanical and Electronic Systems in Drilling Rigs
Sensors: For monitoring pressure, temperature, flow rates, and environmental conditions.
Communication Systems: For data transmission between the rig and control centers.
Fixed Platforms and Jack-Up Rigs: Up to 10,000 meters.
Semi-Submersible Rigs and Drillships: Up to 12,000 meters or more.

What is a modular rig?

Our modular rigs are a breakthrough in its category; an innovative, modular, state-of-the-art design that offers operational flexibility and cost efficiency unrivalled by any other mobile offshore drilling units in the market.

Which rig is a DNV-os-e101 class Rig?

Built in accordance with the NORSOK D-001 Drilling Facilities Standard, the Emerald and Topaz operate in the harshest offshore environments in the world. In addition, the Emerald rig meets the requirements for a DNV-OS-E-101 Class rig.
