

Norwegian screw variable frequency air compressor after-sales guarantee

When should a rotary screw compressor be replaced?

It is understandable the vendor recommends purchasing new equipment as opposed to retrofitting old units with a variable frequency drive (as this earns them larger commissions),but in some cases it is necessary. After about 15-20 years,rotary screw compressors should be replaced.

How long should a rotary screw compressor last?

After about 15-20 years,rotary screw compressors should be replaced. Even with a good reliability program,bearings,air ends,valves,etc...start to wear and fail. At this point,you could rebuild the entire unit,eat the downtime,or purchase a new one.
