

Rock Drill Operator Training School

What does a rock drill operator do?

The job of a rock-drill operator is to operate a tractor-mounted rock drilling machine to drill explosives-charge holes through hard materials to facilitate blasting operations. The job requires the maneuverer to set out-riggers jacks to level the machine, verify level of machine, and insert the steel drill or rock bit into the chuck.

Where are heavy equipment operator training schools located?

With a total area of nearly 60 acres, our two heavy equipment operator training schools in South Brunswick, New Jersey and Middletown, New York train apprentices to become operators, mechanics and field engineers.

What types of heavy equipment operator training does ATS offer?

ATS offers two levels of heavy equipment operator training which include operation of backhoes, bulldozers, excavators, wheel loaders, scrapers, all-terrain fork lifts, motor graders, and articulated off-road dump trucks. These are the types of equipment most common in the industries which hire heavy equipment operators.
