

Rock Drill Tribe

Where can I buy Native American stone tools?

While Native American stone tools and weapons are no longer in widespread use, they can still be found for sale in a number of places. Online auction sites such as eBay or 1stDibs are worth checking, as there is often a wide selection of items available.

Who invented the Rock Drill?

In 1851 Fowle patented a new design that was the seed of the modern rock drill. It was the first to use a flexible hose that made the drill independent from the boiler, and it later pioneered the use of compressed air for power transmission.

Why did mining need a mechanical rock drill?

Mining wasn't the only industry that needed a good mechanical rock drill. Beginning in the 1830s, railroads gave promise of bringing the United States closer together by spanning the prairies and crossing the mountains. But in order to do so, they needed to maintain moderate grades and curvatures.

What were the different types of hard-rock drilling?

In the hand-labor era, which lasted right up to early in this century, there were two kinds of hard-rock drilling: slow and slower, depending on whether it was done by a team of men or by one man working alone. One man swinging a four-pound hammer and holding his own drill rod was called single-jacking. A two-man team was called double-jacking.

What was a jackleg drill?

After World War II the hand-held jackhammer was flexibly attached to a light air cylinder and the Jackleg drill was born, allowing a single miner to drill in any direction without a mounted drill. The new machines weighed around a hundred pounds and could drill two or three feet a minute using the new tungsten carbide-tipped drill bits.

How long does it take to drill a rock tunnel?

In average rock one man might drill 8 inches an hour, while a two-man crew might make 2 feet. It would take 20 to 30 holes, 1 to 1½ inches in diameter, to be able to blast away enough rock to advance a 4-by-6-foot tunnel 4 feet. Drilling those 120 feet of hole might use up 200 pieces of sharpened drill rod over several days.

Pump drill A pump drill is a tool that was used to start fires or drill holes in softer stones or wood. It used round weights, like the loom weights, to help with the ...
