

# Rock drill direct hydraulic control system

Sandvik DS211L-V is a low-profile single boom electro-hydraulic drilling machine designed to work in excavations with headroom as low as 2.25 meters. It can drill and install short bolts (up to ...

Sandvik DS312D is the ultimate versatile rock bolter. Powered in tramping and drilling by low emissions diesel engines (Tier 3, Tier 4F, China 4, Canmet or Stage V), this drill can be used ...

Efficient control system Sandvik RD314 / RD315 are compact, robust and universal hydraulic percussive rock drill. It is known for its hydraulic efficiency and high penetration rate. The SBH ...

The integrated drilling and splitting machine is a kind of engineering machinery that integrates the functions of drilling and splitting. It directly installs the rock ...

Reverse Circulation Drilling Systems RC drilling is the ideal method for large diameters and hard rock drilling. The main advantage in foundation work is having control of the spoils (cuttings).

Integrated Hydraulic Rock Drill & Splitter Integrated hydraulic rock drill and splitter is an advanced non-blasting rock-breaking equipment that can break very hard rocks. The rock drill and ...

Split Mountain KJ310, is a track mounted, electro-hydraulic mining development drill rig, designed for inclined drifts drilling on slope with gradeability near 25 degrees. With fast and accurate ...

TECHNICAL SPECIFICATION Sandvik DT821 is a two-boom electro hydraulic jumbo for fast and accurate drilling in tunneling and cavern excavation. The hydraulic controlled drilling system ...

Integrated hydraulic rock drill and splitter is an advanced non-blasting rock-breaking equipment that can break very hard rocks. The rock drill and splitter ...

An hydraulic feed control system for feeding or retracting a rotary rock drill relative to the work in a selected one of four modes; namely, standard feed; regeneration feed; standard retract; and ...

Efficient control system The THC561 drilling control system with reaming hole selector increases drilling performance and reduces the wear on both rock drill and rock tools for an extended ...

TECHNICAL SPECIFICATION Ranger DX600 is a hydraulic, self-propelled, self-contained, crawler based surface drilling rig equipped with a cabin (F.O.P.S. and R.O.P.S.) and rod ...

World-class Drifter Control Technology Experience powerful drilling with load-sense, progressive-percussion

# Rock drill direct hydraulic control system

pressure control while the progressive-feed control reduces jamming and senses ...

The Furukawa HD715 drifter combines powerful penetration with agility and easy operation. Equipped with features that maximize efficiency, the HD715 drifter sets the standard in high ...

A hydraulic rock drill drifter is a piece of equipment used for mining and for tunnel, railway, and highway construction. It facilitates construction, and reduces labor intensity [1]. At ...

The DL331 is mounted on a 4-wheel drive frame-steered and diesel-powered carrier. It is equipped with the RDX5 hydraulic rock drill, LHF2000 feed, ERCH12 rod handler, SB60P ...

A drilling system is extremely complicated because it is composed of several tightly related downhole subsystems, such as geo-steering, rock-breaking, hydraulic, and drill-string ...

Hydraulically controlled mining and tunnelling face drilling rig with two BUT 28 booms. Available with a variety of rock drills to suit customer requirements.

A fixed rotary speed is adopted when drilling different rocks manually, resulting in an inefficient operation. Taking the characteristics of the electro-hydraulic servo component and ...

Abstract For achieving high-performance control of hydraulic actuator systems, an adaptive sliding mode control with disturbance estimation algorithm is proposed and ...

Hydraulic System: The hydraulic system of a hydraulic rock drill is a critical component, and high-quality hydraulic components can be costly. Maintaining precise control of hydraulic pressure ...

Ranger DX800 is a hydraulic, self-propelled, self-contained, crawler based surface drilling rig equipped with a cabin (F.O.P.S. and R.O.P.S.) and rod handling system.

According to the coupling characteristic of propulsion system and impact system of hydraulic rock drill, deduced the calculation formula of optimal axial thrust for the propulsion ...

Conclusion As efficient and energy-saving drilling equipment, hydraulic rock drills play a crucial role in modern mining and tunnel ...

Integrated hydraulic rock drill and splitter is an advanced non-blasting rock-breaking equipment that can break very hard rocks. The rock drill and splitter are perfectly combined with the ...

The exceptional "V"-shape layout is designed for good visibility and balance, which, combined with the powerful four-wheel-drive articulated carrier, ensures fast and safe manoeuvring even in ...

## Rock drill direct hydraulic control system

A fully mechanized bolting rig is equipped with a control system for positioning, drilling and bolting, a hydraulic rock drill, and a bolt magazine containing rockbolts for installation.
