Air compressors are versatile tools that find applications in a wide range of professional jobs and DIY tasks. At Harbor Freight Tools, we understand the importance of having the right air compressor for your specific needs.

How much does it cost to run a compressor?

Today, an electricity cost of \$0.12/kWh to \$0.20/kWh or more may be more appropriate. At \$0.12/kWh, this compressor will cost about \$10,000 per year to run, based on the hours of use shown in the example. This calculating is just to give you an idea, research the cost of energy in your area and apply it to this formula!

Are all compressor maintenance costs the same?

Not all compressor maintenance costs are the same, and so, it may be worth checking before selecting a compressor and comparing the maintenance costs down the line. Included in the maintenance part of the equation is the cost of the spare parts for regular maintenance and parts costs for emergency repair.
