What is a GR oil injected compressor?

GR oil-injected compressors provide a reliable air supply of up to 20 bar for high pressure applications in the toughest working conditions. G (VSD) oil-injected screw compressor (2-250 kW) for reliable high-quality air, avoiding costly downtime and production delays. Even in the harshest conditions. The demands on air compressors are growing.

What is an oil injected rotary screw compressor?

This type of compressor is usually picked by users needing large volumes of medium pressure air. One of the main selling points for users is the absence of a duty cycle. An oil-injected rotary screw compressor could run for the entire length of a working day and suffer no ill effects. As a matter of fact, it would be beneficial.

Why do screw compressors have a small footprint?

This is to minimize mechanical losses (due to heat at very high speed) and volumetric losses (air losses due to very low speed) during compression. A good example of a screw compressor that can produce large volumes of compressed air and with a small footprint is our GA VSD +air compressors.
