What is a screw compressor?

A screw compressor is a type of compressor that employs screws to continuously compress fluids. One notable example is the air compressor, where air drawn in from the intake is compressed between a pair of screws and discharged as compressed air. This is the principle behind screw compressors known as the twin-screw type.

Who makes electric air compressors?

Electric includes brands such as Sterling, ABB, and Leeson as well as wiring services and parts and accessories. Alup Kompressoren, founded in 1923 and based in Robassomero, Italy, is a manufacturer of compressed air solutions and compressors, including screw, piston, and oil-free compressors.

Why is after-sales service important for air compressor manufacturers?

When selecting an air compressor manufacturer, the importance of after-sales service and support cannot be overstated. After-sales service plays a critical role in maintaining customer satisfaction and loyalty, ensuring that the equipment operates efficiently and reliably over its lifespan.

How to choose an air compressor manufacturer?

An air compressor is a device used to compress gases. It shares a similar construction with water pumps. Most air compressors are of the reciprocating piston type, rotary vane, or rotary screw variety. When selecting an air compressor manufacturer, the brand's market position and product diversity should be the primary considerations.
