What is a NEMA rating scroll & screw compressor motor?

Compressor Motor NEMA Rating Scroll and Screw compressor motors are a definite purpose motor applied to Trane's specific requirements and do not fall into a NEMA classification. In general purpose open motors, NEMA refers to a design type A, B, C or D which have to do with the motor starting current and torque characteristics.

What is the temperature limit for a screw compressor?

Standard screw compressor package design based on IIAR/mechanical code equipment room limits of 104°F(40°C). Screw package high temperature limit based on WEG motor. Other motor ratings are available for special applications. Screw package low temperature limit based on oil temperature limits.

What is a compressed air compressor?

Design and operation of the equipment or apparatus which uses the compressed air. Air compressor systems that are an integral part of facilities for processing petroleum, petrochemicals, or chemicals, including air separation plants. These are covered by ASME B19.3, Safety Standard for Compressors for Process Industries.

What are the safety standards for air compressors for process industries?

These are covered by ASME B19.3, Safety Standard for Compressors for Process Industries. The principles promoting safe generation and use of compressed air are not restricted to new air compressor systems. It is recommended that all air compressor systems be reviewed to consider possible changes due to revision of this Standard.

What are the different types of rotary air compressors?

Major types of rotary air compressors include rotary sliding vane, rotary helical screw and rotary scroll air compressors. Reciprocating single acting compressors are generally of one-stage or two-stage design. Compressors can be of a lubricated, non-lubricated or oil-less design.

Can I re-order a screw compressor package?

Re-order if there are specific requirements. For CRN (applicable to items going to Canada): 300 psi screw compressor packages meet this requirement. Other screw compressor packages such as 400 psi (2757 kPa) HPS packages ship loose. Vessels and heat exchangers are registered during the design process.
