

Screw air compressor screen modification

Does industrial air power rebuild rotary screw air compressors?

We rebuild your air end and return it to you, like new! Industrial Air Power is your premier resource for air-end rebuilds for all rotary screw air compressors from 10hp up to 1000hp. With thousands of remanufactured air ends completed since 2008, Industrial Air Power offers a reputable, reliable air end rebuilding service with unrivaled prices.

Can You rebuild an air compressor?

We can rebuild most air compressor brands we sell and service. Rebuilds include new gaskets, bearings, O-rings, repair of rotors, and seals, metalizing the shafts, inlet valve rebuild, and end plate repair if needed. We can also service the drive motor, "clean & bake" the windings, and install new seals and bearings on direct-drive units.

What should I do if my air compressor is too low?

If the capacity of the air compressor is really too low, check the following: Check differential pressure over oil separator. Replace separator when necessary. Check and replace compressed air filters (if installed). Compressor does not unload. Check if pressure switch is correctly set and working.

Who specializes in air compressor Controlle?

hai) Co., Ltd specializes in the manufacture and R&D of air compressor controlle. We are devoted to win customer obligation for the modification and improvement on the previously delivered products. The design of products is subject to change without notice. Please feel free to contact our after-sale service.

How do I know if my air compressor is working?

If you have a compressed air dryer, check the dewpoint. Check the current draw with a current clamp meter. If the motor draws excessive current: Try to turn the compressor by hand. It should be possible to turn it around. It should turn around smoothly, without any 'hiccups' (be sure to completely shut down the air compressor!).
