

Small down-the-hole drill wheel modification video

How do you drill a hole in a wheel Chuck?

If you have a wheel with a hole smaller than your arbor, you can just drill it out. Stuff paper into the hole in your chuck so wheel grit cannot get into the scroll of the chuck. Best to take the chuck apart afterwards and carefully clean it if you value the longevity of the chuck's accurate life. Select a HSS drill the size you want the hole to be.

How do you make a wooden roller with a drill press?

You now have your own adjustable woodworking guide for your drill press! Using your drill press, cut out a series of wooden disks from some wood as needed. You'll need eight in total. Once done, glue them together and insert them on a steel rod to make a wooden roller.
