

Suichang screw air compressor brand investment

What is a screw compressor?

A screw compressor is a type of compressor that employs screws to continuously compress fluids. One notable example is the air compressor, where air drawn in from the intake is compressed between a pair of screws and discharged as compressed air. This is the principle behind screw compressors known as the twin-screw type.

How to choose an air compressor manufacturer?

An air compressor is a device used to compress gases. It shares a similar construction with water pumps. Most air compressors are of the reciprocating piston type, rotary vane, or rotary screw variety. When selecting an air compressor manufacturer, the brand's market position and product diversity should be the primary considerations.
