

Sullair screw air compressor video tutorial

Do Sullair compressors really work?

Sullair compressors do what they're supposed to do, and they do it extremely well for a very long time. With our expertise in analysing, managing and controlling compressed air, Sullair offers total compressed air solutions to help you reduce energy costs and improve productivity.

What is a Sullair drill compressor?

Sullair's drill compressors are characterized by a rugged, two-stage rotary screw design and forward thinking innovation, making them a perfect match for any drilling applications. Sullair offers High Pressure - Dual Stage Drill Compressor Kits.

How do I get parts for a Sullair compressor?

High humidity conditions require longer drain times or more frequent openings. Parts should be ordered from the nearest Sullair Representative or the Representative from whom the compressor was purchased. If for any reason parts cannot be obtained in this manner, contact the factory directly at the addresses, phone or fax numbers listed below.

How does a Sullair process gas compressor work?

Sullair process gas compressors function with several built-in volume ratios to match pressure ratio requirements, as well as several internal gear ratio options for flexibility and economy. Capacity control is offered on several models via slide valves or spiral valves.

Does a Sullair compressor need lubricant?

With a Sullair compressor, there is no maintenance or inspection of the internal parts of the compressor unit permitted in accordance with the terms of the warranty. The 3700 Series compressors are factory-filled with Sullube lubricant. For more information on fluid fill, consult Section 3, SPECIFICATIONS.

How does a reciprocating compressor work?

Because their compression process creates a pulse in the air stream, reciprocating compressors always require integral storage, even when they are oil free. By providing the air from the receiver tank, instead of directly from the compression chamber, the air stream can have a continuous flow and pressure.
