

Two-plow rock drill

Do you need personal protective equipment for rock drilling?

Every drill operator knows that the best way to avoid injury is to be equipped with the proper gear. The right protective equipment acts as the first line of defense against hazards that are part of the rock drilling landscape. Wearing personal protective equipment (PPE) isn't simply recommended; it's essential. The critical items include:

Are Atlas Copco rock drills good?

The Atlas Copco rock drills are designed for various types of drilling in construction and mining applications. The rock drills are light and easy to handle, which makes them ideal for those quick jobs and for working in difficult-to-get-to areas. The Hand and Arm Protection System, helps to reduce harmful vibrations with up to 75%.

What type of drill is best for a rock piercing?

Rotary Drills: Best for penetrating hard rock, these utilize a rotating motion combined with some form of hammering. Impact Drills: These deliver rapid blows to break the rock as they drill, making them effective for tougher materials. Percussive Drills: Ideal for softer rocks, they operate with a percussion mechanism without the rotary function.

This happens several thousand times per minute in some cases and is much more effective than electric drills or core drills in rock and concrete. There are many things to consider when ...
