What is a rotary screw air compressor?

A rotary screw air compressor is one of the two types of positive displacement gas compressors. It uses two rotors to create the pressure needed for air compression. They are one of the easiest types of air compressors to use and maintain. The other type of positive displacement compressor is the reciprocating or piston compressor.

What are the applications of screw compressors?

Applications of screw compressors are as follows ; 2) Pressure ratio: less than 3 bar in one stage and up to 12 to 14 bar in two stages. 3) It is used in industrial refrigeration. A screw compressor is a type of rotary compressor which compresses air due to screw action.

What is a screw air compressor?

It's like having your own personal air genie, ready to grant your pneumatic wishes whenever you summon it. In essence, screw air compressors are the unsung heroes of the industrial world, tirelessly working behind the scenes to keep operations running smoothly. How does a screw air compressor work?

As the screws turn, the air is continually compressed. Screw air compressors are widely used for applications that require high CFM (Cubic Feet of air per Minute) and continuous use. This is the most commonly used air compression technology for heavy industrial applications such as powering pneumatic production lines and conveyor systems.

Why do you need a screw air compressor?

With a screw air compressor, you can enjoy a reliable source of compressed air without breaking the bank on energy costs. It's like having a super-efficient sidekick in your workshop, always ready to jump in and save the day without draining your resources. So, why not make the switch to a screw air compressor and start reaping the benefits today?

Should I use a screw compressor?

We usually recommend a screw compressor. A screw compressor is a better option for your higher CFM requirements. Plus, a screw compressor is more efficient, quieter, cleaner and it has a lot of other benefits. There is a slight cost associated with these benefits, of course, but we feel the return is well worth it.
