

What is a screw air compressor oil return pipe?

The oil return pipe of the screw air compressor is an important part of the oil circulation system. Its main functions include: 1. Stable oil return: The oil return pipe smoothly draws the lubricating oil at the bottom of the oil-gas separator back into the compressor casing to maintain the stability of the oil circuit circulation.

What is the scavenge line on a rotary screw compressor?

The scavenge line is found on all bigger oil injected rotary screw compressors and plays a crucial part in the removal of oil from the compressed air. Most people know that the oil separator filter is the part that separates the oil from the compressed air. But that is only part of the story. The oil separation process consists of three steps.

How does an air compressor lubricant valve work?

When the air compressor is first started, and the oil is cold, this valve will direct our oil straight into the air end and bypass the oil cooler. This will ensure the lubricant heats up quickly and can effectively perform all the tasks we demand of it.

Do flooded rotary screw air compressors need lubricating oil?

The principles and importance of clean, warm lubricating oil are the same for all flooded rotary screw-type air compressors, so though there may be a variance on the operational order in your air compressor, the principles and required components remain the same.

Why is my rotary screw air compressor not working?

Fortunately, modern rotary screw air compressors have controls that will shut the machine down if a loss of lubricant or high temperatures are detected, preventing catastrophic damage to the air end. Another possible but uncommon failure could be related to a valve unable to cycle or move to its alternate position.

There are different reasons cause this problem, Check out the correct cause and solve it in time to ensure the normal and long-term operation of the air ...

We tackle your FAQs about rotary screw air compressor oil. Find out what it is, why it's important & how to check and change your air compressor oil!
