

Water-lubricated variable frequency oil-free screw air compressor

What is oil-free water lubricated screw air compressor?

Oil-free water lubricated screw air compressor is mainly composed of compression element, water cooler, water separator, high efficiency filter element, control system and so on.

What is an oil lubricated screw compressor?

Unlike traditional oil-lubricated screw compressors, it replaces lubricating oil with water, avoiding oil contamination and ensuring that the output air is completely oil-free. This design is ideal for industries that require high air purity, such as pharmaceuticals, food processing, and electronics manufacturing.

What is the difference between oil-free and dry screw compressors?

10% higher airflow capacity than dry oil-free screw compressors, with an exhaust temperature below 50°C. Absolute oil-free cleanliness, suitable for direct breathing applications. Lower dew point of saturated compressed air, with moisture content 25% lower than dry screw compressors.

What are AQ water injected screw compressors?
