

Xiangyang screw air compressor head

Does industrial air power rebuild rotary screw air compressors?

We rebuild your air end and return it to you, like new! Industrial Air Power is your premier resource for air-end rebuilds for all rotary screw air compressors from 10hp up to 1000hp. With thousands of remanufactured air ends completed since 2008, Industrial Air Power offers a reputable, reliable air end rebuilding service with unrivaled prices.

Who is screw compressor technologies?

Screw Compressor Technologies (SCT) located in Buffalo, New York has been in the air end rebuilding business since 1980. SCT will rebuild and restore any air and gas compressing unit to their Original Equipment Manufacturer (OEM) specifications.

What is a cylinder head in an air compressor?

As the name implies, a cylinder head sits at the top (head) of an air compressor pump. Its purpose is to route air through the compressor and to dissipate heat. Although it is uncommon for a cylinder head to deteriorate with normal use, damage from accidental impacts (such as dropping the unit) would necessitate replacement.

What is the function of a compressor head?

The compressor head is one of the vital components of your compressor and the part that drives the entire mechanism. When it comes to the repair of this key piece, trust high-quality products and experienced technicians, like those at Compressed Air Systems.

How do you remove a cylinder head from an air compressor?

DEPRESSURIZE THE AIR TANK. Always depressurize the tank before servicing an air compressor. To do this, open the drain valve and wait until all of the air (and pressure) has escaped. **REMOVING THE CYLINDER HEAD** [top] 1. Remove the manifold cover. Remove the retaining screw. Lift the manifold cover away from the unit. 2.

How do you install a compressor head?

Align the valve plate assembly (and cylinder gasket) with the compressor pump. (The cylinder gasket and the exposed valves should be facing the cylinder-side of the pump.) Align the head gasket with the valve plate assembly. Install the cylinder head. Install the head bolts.
