How do I dispose of old air compressors?

One option is to take it to a recycling center that specializes in scrap metal. They will often accept air compressors and other metal appliances and dispose of them safely. Another option is to contact your local waste management company to inquire about their e-waste disposal services.

Can you recycle an air compressor tank?

While the metals of an air compressor, including the motor, can be sold for scrap, the tank itself can be recycled. However, you will need to call ahead to a scrap metal recycler to ensure they can accept it. Alternatively, there are DIY projects that can be done with an air compressor tank if you have time and want to reuse it.

Should you sell or donate old air compressors?

Before recycling an air compressor, release all pressure from the tank to prevent dangerous, accidental releases. Often, selling or donating old air compressors depends on their level of functionality. There are some more things to know about each of those options than just the basics.

What should you do before recycling an air compressor?

Before recycling an air compressor, release all pressure from the tank to prevent dangerous, accidental releases during the recycling process. Often, however, selling or donating old air compressors depends on their level of functionality.

Can an air compressor be placed in a trash can?

No, an air compressor is too big to fit in the trash can. It typically consists of a motor, a tank, a pump, and some cords. To dispose of it, you'll need to separate every part possible for recycling.

What can you do with an old air compressor tank?

The tank itself will need to be taken to a scrap metal recycler as well, however, you will need to call ahead and make sure they can take it. There are also a couple of DIY projects that can be done with an air compressor tank if you have time and want to reuse it. The metals can be sold for scrap, this includes the motor.
