What is a down the hole drilling rig?

Down the hole drilling rig is an impact rotary drilling rig. Its internal structure is different from that of a general rock drill.

What is a down-the-hole drilling method?

The video shows the down-the-hole drilling method for very hard soil or rock. A rotary drilling rig, type LB 20, working with down-the-hole hammer inside a casing. A flushing current conveys the loosened drill cuttings upwards and exits at the upper end of the casing.

Are Yugong rigs good for drilling?

Yugong rigs offer excellent drilling capabilities and keep fuel consumption and operating costs to a minimum. Yugong's new generation of down the hole drilling rigs can stand up to any task, including production drilling, quarry/mine development and wall control.

What is a DTH drill rig?

DTH Drill, also called shallow surface drill rigs and rock drills, combine performance and economy, making them ideal for quarries or construction sites. Yugong rigs offer excellent drilling capabilities and keep fuel consumption and operating costs to a minimum.

What is down-the-hole (DTH) drilling?

Down-the-hole (DTH) drilling has made it easier for contractors to drill wells faster and more efficiently, and to transition from dirt boring to rock boring just by adding a compressor and hammer to the drill bit.

How does a rotary drilling rig work?
